“Twisted Wonderland” as a Full-time Student

Sofia Perez ~ ENVS 193DS

Data Information

Date of first observation: Jan. 26, 2026

Date of last observation: Mar. 6, 2026

Number of observations: 32

Figure 1. As time in class increases (x-axis), game screen time somewhat decreases (y-axis). Lighter color represents higher count in bin.

Figure 2. Moderate positive correlation between time visiting friends and game screen time. Moderate negative correlation between number of assignments due and game screen time.

Figure 3. Game screen time tends to peak at the beginning of the week and decreases overall with passing weeks.
